Cat 3W/4N Models can convert between Cat 3W and 4N on the TRACTOR SIDE. The Implement side is fixed at 3W.

Cat 4N Models can convert between Cat 3W and 4N on the IMPLEMENT SIDE. The tractor side is fixed at 4N.

AcuraTrak GPS Implement Guidance

- The AcuraTrak is compatible with John Deere's Active Implement Guidance and Trimble's True Tracker Control Systems
- Modern GPS Systems deliver sub inch accuracy to the tractor but NOT TO THE IMPLEMENT
- GPS Implement Guidance is a great option in situations where mechanical sensors cannot be used
- When paired with Active Implement Guidance Control systems the Sunco AcuraTrak delivers sub inch accuracy to 3 Pt. Mounted Implements
