Sunco Floating Saber Tooth Trash Discs **Your Planter has parallel linkage so why don't your row cleaners?**

Floating arms maintain optimal cleaning at any height

Adjustable Cam allows you to adjust to different soil conditions or farming practice

Polymer Depth Bands create flotation in soft soil conditions and minimize soil buildup in wet conditions

- **All the same field proven advantages of the original Sunco Saber Tooth: Disc Concavity, Exclusive Tooth Design, and Disc Separation**
- **Removes residue from the seedbed that can cause seed germination and emergence problems or disease and damage to young seedlings**
- **Floating parallel arms allow the Floating Saber Tooth to follow the contours of the field consistently clearing residue**
- **Industry exclusive parallel linkage design allows for optimal performance at any location of travel**
- **Can be used in conjunction with the  Precision Planting CleanSweep® system (not included) which allows for quick and effortless in cab adjustment of row cleaner down pressure**

Spring down pressure

➤ **Optional Spring Down Pressure Kit features built in spring adjustment tensioner with 4 adjustment levels**

➤ **Sunco's original swept back tooth design eliminates hair pinning of residue, moves and releases trash as the discs rotate - preventing wrapping**

5 Sided Cam is easily adjustable with a 3/4" Wrench

➤ **Offset disc design prevents competition for trash that leads to plugging plus it also allows for disc overlapping to ensure residue is removed from entire seedbed**

**Heavy Duty
Cast Hubs
With 2 Triple
Seal
Bearings**

Specifications

Discs - Concave 13" with swept back teeth
Hub - Heavy Duty Cast, 6 bolt
Bearings - 2 High Quality Triple Seal
Adjustment - Floating with 5 position Cam down-stop
Materials:
Mount - High Quality Grade 50 Steel
