Puts Fertilizer In The ROOT ZONE - Not On The Soil Surface.

Check-valve keeps lines from draining at the end of the field.

Can easily be adjusted for both depth of fertilizer placement and distance from seed.

Easily mounts to row units on John Deere, Kinze, Great Plains, White and Case-IH planters

Sunco's unique design allows discs to be pulled thru the field which improves planter tracking, reduces bearing and disc fatigue, plus eliminates stress on parallel linkage.

Because Nutri Mate 3™ is mounted to the row unit, the planter parallel links let it float and the unit gauge wheels provide depth control so nutrients are precisely placed in relation to the seed.

Bolt on blades, standard equipment

Notched disc leads smaller diameter smooth disc to allow soil penetration even in the highest trash conditions while still forming groove for fertilizer placement.

Inside scraper

*The Sunco NutriFloater combines the NutriMate 3 with Floating Saber Tooth Row Cleaners and is compatible with the Precision Planting CleanSweep System.

- ◆ A fertilizer placement opener to precisely place nutrients in a 2x2 proximity to the seed, reduce germination problems and encourage rapid plant growth

- ◆ Works well in all farming operations including conventional, no-till, strip-till and minimum-till

Nutri Mate 3™ available for Case-IH Planters

The Time to Apply Nitrogen is When You Plant

* Precision Planting and CleanSweep® are Registered Trademarks of Precision Planting LLC

Exclusive features put **Nutri Mate 3™** in a class by itself!

NutriMate 3's now feature greaseable pivot arms.

Exclusive maintenance-free 10° pivot allows **Nutri Mate 3™** to flex independently of planter row unit.

Discs are pulled and not pushed - improving performance.

Fertilizer Placement

Distance

- 2 1/4" from seed
- 3 1/4" from seed
- Increased distances available contact **SUNCO**

Depth Adjustments

- 1/2" above seed
- 1/2" below seed
- 1" below seed

(notched disc removed)

- ◆ Inside scraper prevents material build-up between blades
- ◆ The delivery tube, which is easy and inexpensive to replace and resists plugging, places fertilizer in the bottom of the soil opening
- ◆ Narrow double disc design reduces the amount of soil disturbed

Shown with Pin Adjust Saber Tooth Row Cleaners

Nutri Mate 3™ will not only supply plants with starter fertilizer for immediate and vigorous emergence, but adequate amounts of nutrient can be applied to sustain plants during their yield producing growth.

Specifications and Standard Equipment

- Weight - 45 lbs.
- Distance from face plate - 15" w/Sunco:
- Pin Adjust Saber Tooth Row Cleaner - 25"
- Floating Saber Tooth Row Cleaner - 25.5"
- Disc size: 13.5" Notched
- 12" Smooth
- 4 P.S.I. check valve
- Heavy duty Inside scraper
- Bolt on hub-blade assemblies
