Your Solution For Accurate Dry Fertilizer Placement

Easily mounts to row units on John Deere, Kinze, White and Case-IH planters

Because NutriMate 3 is mounted to the row unit, the planter parallel links let it float and the unit gauge wheels provide depth control so nutrients are precisely placed in relation to the seed.

- ◆ Shown with optional Floating Saber Tooth Row Cleaners

Sunco's unique design allows discs to be pulled thru the field which improves planter tracking, reduces bearing and disc fatigue, plus eliminates stress on parallel linkage.

- ◆ A unit developed to precisely place fertilizer in correct proximity to seed, reduce germination problems and encourage rapid plant growth
- ◆ Works well in all farming operations including conventional, no-till, strip-till and minimum-till

Notched disc leads smaller diameter smooth disc to allow soil penetration even in the highest trash conditions while still forming groove for fertilizer placement.

The Time to Apply Nitrogen is When You Plant

The Nutri Mate 3 pays for itself by reducing input costs:

- ◆ Subsurface application of dry fertilizer eliminates nitrogen loss due to volatilization
- ◆ Banding of dry fertilizer can increase fertilizer use efficiency by as much as 100% depending on row spacing

Exclusive features put **Nutri Mate 3™** in a class by itself!

Nutri Mate 3™ now feature greaseable pivot arms.

Exclusive 10° pivot allows **Nutri Mate 3™** to flex independently of planter row unit.

Discs are pulled and not pushed - improving performance.

Fertilizer Placement

Distance

- 2 1/4" from seed
- 3 1/4" from seed
- Increased distances available contact **SUNCO**

Depth Adjustments

- 1/2" above seed
- 1/2" below seed
- 1" below seed

(Smooth disc removed)

- ◆ The delivery tube, which is easy and inexpensive to replace and resists plugging, places fertilizer in the bottom of the soil opening
- ◆ Narrow double disc design reduces the amount of soil disturbed

Shown with Pin Adjust Saber Tooth Row Cleaners

*The Sunco NutriFloater combines the **Nutri Mate 3™** with Floating Saber Tooth Row Cleaners and is compatible with the Precision Planting CleanSweep System.

Nutri Mate 3™ will not only supply plants with starter fertilizer for immediate and vigorous emergence, but adequate amounts of nutrient can be applied to sustain plants during their yield producing growth.

Specifications and Standard Equipment

- Weight - 45 lbs.
- Distance from face plate - 17" w/Sunco:
- Pin Adjust Saber Tooth Row Cleaner - 27"
- Floating Saber Tooth Row Cleaner - 27.5"
- Disc size: 13.5" - Notched, 12" - Smooth
- Heavy duty inside scraper
- Bolt on hub-blade assemblies
