AGGRESSIVE AT REMOVING TRASH

Mounts on John Deere, Kinze, Case-IH, Monosem, White and Great Plains planters.

Will continue to operate in wet conditions. Tills soil surface to reduce crusting.

Can be used in front of the Nutri Mate 3 Sunco's 2 x 2 liquid fertilizer placement opener.

Saber Tooth design gives positive rotation to reduce plugging in heavy trash conditions.

Can be easily adjusted to move trash only or both trash and soil without plugging.

Works well in ecofallow, no till or minimum till applications.

Case IH models 800 - 1200

Mounted on JD's screw-adjust conservation tillage hanger bracket

Trash discs mounted on Sunco Nutri Mate 3

Sunco's Single Disc Cleaner

For narrow and twin row crops

Sunco's Single Saber Tooth

How To Move Trash Without Plugging When Planting

A New Solution For An Old Problem

Farming in Trash Requires the Right Equipment

Leaving more residue when planting to prevent wind and water erosion is a necessary and accepted farming practice. How to move the trash and make an acceptable seed bed has been a problem. Smooth or notched discs move too much soil, causing unwanted planting depressions and leaving the seed bed susceptible to crusting. Finger wheels have no concavity and when placed at an angle skid through the soil, which can bend teeth, and tend to push and wrap trash.

Sunco's Trash Discs Solve the Problems of Farming in Trash

A concave disc, when placed at an angle, will turn easily and flow material to the side. Concavity, along with Sunco's unique tooth design, allows the trash discs to contact material in the seed bed, then flow and release it between the rows. This tooth design also prevents the concave disc from plowing into the soil. Sunco also separates the lead and trail discs. This is very important, because when just moving trash, trash is all that turns the discs. If they are competing for the same stalk, root balls, or residue, they will stop turning and plug. The separation of the two discs allows each disc to move material and not compete with the other disc for the same material.

Sunco Row Cleaners with exclusive disc concavity, unique tooth design, and disc separation, allow planting in the toughest trash conditions without plugging!

Disc concavity allows for positive rotation and trash flows out of the seedbed.

Sunco's exclusive **Saber Tooth** Design, teeth point down to release trash as discs rotate up.

Disc separation prevents competition for trash.

Sunco Row cleaners **WORK** When The Others Plug!

Heavy Duty Cast Hubs With 2 Triple Seal Bearings

Adjustment tool and **QuikAdjust™** Pen make height adjustments EASY!

Specifications

Discs - 13" with swept back teeth
Hub - heavy duty cast, 6 bolt
Bearings - 2 high quality triple seal
Adjustment - pin type in 1/4" increments
Weights:
Discs & Stem Assembly - 25 lbs.
Mount Brackets - 4 to 8 lbs.
