EFFECTIVELY CLEARS RESIDUE IN ALL CONDITIONS
WITHOUT PLUGGING

Mounts on John Deere,
Case IH, Kinze, White,
Great Plains, and
Monosem

- Pin Adjust, ScrewAdjust
  and Narrow Row Models
  Available to suit your
  farming practices

- Pin Adjust Models can be
  used in conjunction
  with the Sunco NutriMate 3
  Precision Fertilizer
  Applicator

- Heavy duty construction
  for seasons of
  maintenance free use

Mounted on JD’s screw-adjust
conservation tillage hanger bracket
How To Move Trash Without Plugging When Planting
A New Solution For An Old Problem

Farming in Trash Requires the Right Equipment
Leaving more residue when planting to prevent wind and water erosion is a necessary and accepted farming practice. How to move the trash and make an acceptable seed bed has been a problem. Smooth or notched discs move too much soil, causing unwanted planting depressions and leaving the seed bed susceptible to crustng. Finger wheels have no concavity and when placed at an angle skid through the soil, which can bend teeth, and tend to push and wrap trash.

Sunco's Trash Discs Solve the Problems of Farming in Trash
A concave disc, when placed at an angle, will turn easily and flow material to the side. Concavity, along with Sunco's unique tooth design, allows the trash discs to contact material in the seed bed, then flow and release it between the rows. This tooth design also prevents the concave disc from plowing into the soil. Sunco also separates the lead and trail discs. This is very important, because when just moving trash, trash is all that turns the discs. If they are competing for the same stalk, root balls, or residue, they will stop turning and plug. The separation of the two discs allows each disc to move material and not compete with the other disc for the same material.

Sunco Row Cleaners with exclusive disc concavity, unique tooth design, and disc separation, allow planting in the toughest trash conditions without plugging!

Disc concavity allows for positive rotation and trash flows out of the seedbed.

Sunco's exclusive Saber Tooth Design, teeth point down to release trash as discs rotate up.

Disc separation prevents competition for trash.

Heavy Duty Cast Hubs With 2 Triple Seal Bearings

ScrewAdjust Models can be adjusted without crawling underneath the planter.

Specifications
- Discs - 13” with swept back teeth
- Hub - heavy duty cast, 6 bolt bearings - 2 high quality triple seal
- Discs & Stem Assembly - 25 lbs., Mount Brackets - 4 to 8 lbs., ScrewAdjust - 44 lbs. per row

Adjustment tool and QuikAdjust™ Pen make height adjustments EASY!

On this 3000 acre farm close to York, Nebraska, this farmer experienced severe plugging problems when planting the first 100 acres using a new 16 row planter equipped with factory cleaning wheels. With trash conditions even worse on the remaining acres, Sunco's Trash Discs were installed. After planting, using the words of a very satisfied farmer 'We were desperate, but the Sunco Row Cleaners solved the problem. We never plugged once!'
