SUNCO TM

STABILIZER

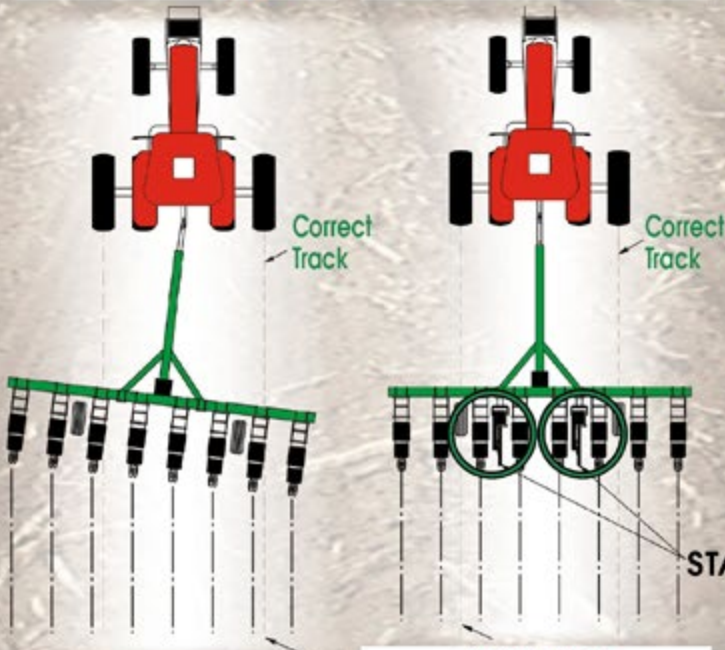

Implement drift with a **SUNCO**™ Stabilizer.

WHEN THE PLANTER TRAILS ON HILLS LIKE THIS...

... STRAIGHTEN IT OUT WITH SUNCO STABILIZERS

Planter Mount Bracket allows stabilizer installation between planter units with row spacing 30 inches or wider.

GPS Guidance line and crop rows no longer align

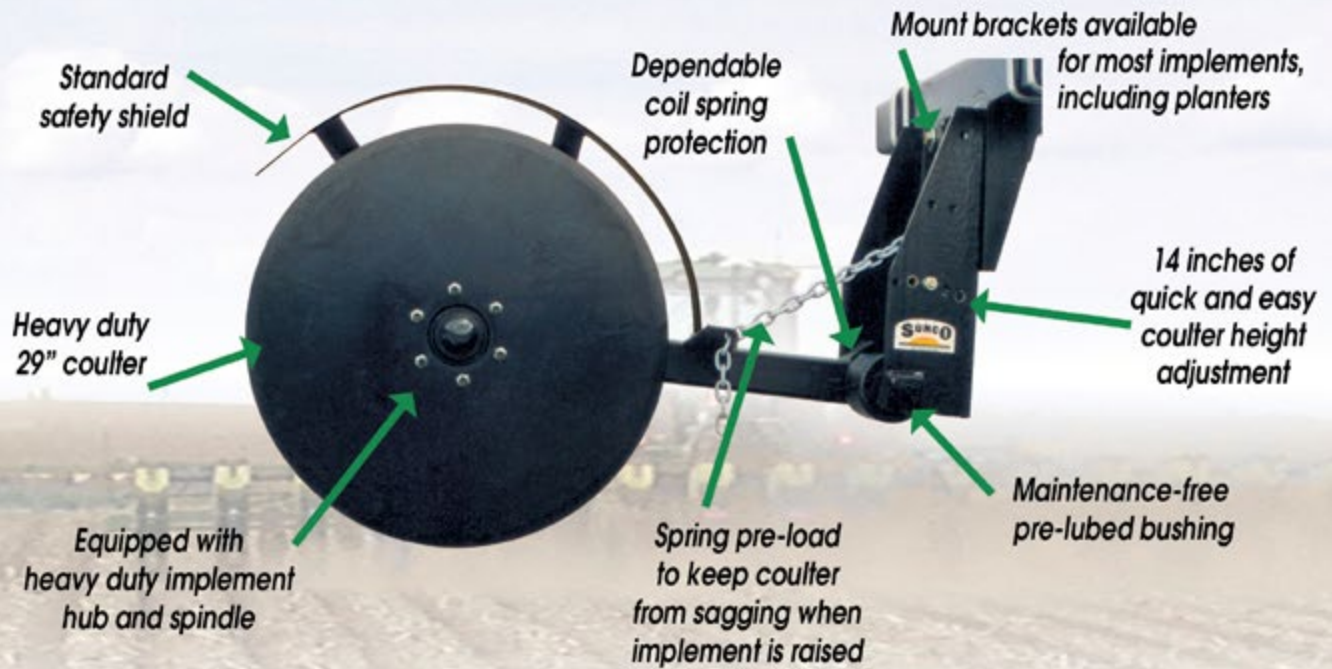

Correct Track
No Difference between crop rows and GPS Guidance Line

Pull-type or . . .

Mounted

The **SUNCO**™ **STABILIZER** **Stands Alone With These Features.....**

Designed To Stabilize The Heaviest Equipment

- Optional mounting brackets: 8", 24", 48", 60", 72" and planter mount
- Mounts to 7x7, 5x7, 4x4 and 4x7 tool bars
- Gives positive position control for any implement to eliminate slippage
- Improves performance of GPS guidance and steering type guidance systems and reduces implement parallel linkage wear
- Can be mounted on implements such as planters, bedders, cultivators, etc.
